PROFESSIONAL SUMMARY

Senior React Developer with 6+ years of experience building scalable, secure, and high-performance web applications across FinTech and Payments, Insurance, HRMS, ERP, Healthcare, and E-commerce domains. Strong expertise in React.js, Next.js, TypeScript, JavaScript (ES6+), Redux Toolkit, React Query, REST API integration, reusable component architecture, and role-based access control. Experienced in leading a team of 3 engineers, driving frontend architecture, sprint planning, effort estimation, code reviews, UAT, production releases, and stakeholder coordination. Hands-on across the full SDLC, from requirement analysis and Figma-to-UI implementation through deployment and post-release support, with a focus on performance optimization, complex dashboards, secure workflows, and maintainable UI systems. Available to join immediately.

TECHNICAL SKILLS

Core Frontend: React.js (Hooks, Redux, Context API), Next.js (App Router, SSR, SSG, API Routes), TypeScript, JavaScript (ES6+), HTML5, CSS3, Responsive Design

State Management & Data: Redux, Redux Toolkit, React Query / TanStack Query, TanStack Table, Zustand, Context API, REST API Integration, AJAX, JSON

UI Libraries & Styling: Tailwind CSS, Material UI, Ant Design, ShadCN UI, Bootstrap, Telerik Kendo UI, jQuery, amCharts

Architecture & Performance: Frontend Architecture, Component-Driven Design, Reusable Component Libraries, Design Systems, Micro-Frontends, Clean Architecture, SOLID Principles, React.memo / useMemo / useCallback optimization, Cross-Browser Compatibility, MVC Architecture

Security & Access: JWT Authentication, Protected Routes, Role-Based Access Control (RBAC)

Testing & Quality: Jest, React Testing Library, Manual Testing, API Integration Validation, UAT Support, Code Reviews, Debugging

Accessibility: Semantic HTML, ARIA Attributes, Keyboard Navigation

Tools & DevOps: Git, GitHub Actions (CI/CD), Bitbucket, Jira, Vite, Webpack, npm, Vercel, Netlify, Figma, Adobe XD
Methodology & Leadership: Agile/Scrum, SDLC, Sprint Planning, Effort Estimation, Task Allocation, Mentoring, Stakeholder Coordination

AI-Assisted Dev Tools: ChatGPT, Claude, DeepSeek, OpenCode, Google Gemini, GitHub Copilot, Cursor, Perplexity - used for development support, research, and improving productivity

PROFESSIONAL EXPERIENCE

Senior Software Developer — Haoda Technology Pvt Ltd — Jan 2025 – Sep 2026

Mumbai, India · FinTech / HRMS / ERP · Products: Merchant Payment Platform, HRMS SaaS, ERP SaaS

- Led frontend architecture and development for enterprise SaaS and FinTech applications using React.js, Next.js (App Router, SSR/SSG), TypeScript, Redux Toolkit, React Query, and Zustand, ensuring consistent and maintainable development across product modules.
- Built reusable UI components and shared frontend patterns for HRMS, ERP, and payment workflows, reducing duplication and improving consistency across applications. Implemented scalable state management and API integration patterns using Redux, React Query, and REST APIs to support complex business workflows and data-driven dashboards. Worked hands-on with micro-frontend architecture on the Merchant Payment Platform and other Haoda projects.
- Reduced unnecessary re-renders in complex enterprise dashboards using React.memo, useMemo, and useCallback, guided by component profiling.
- Developed HRMS modules covering employee management, attendance, payroll, leave, recruitment, tax management, performance, shift management, and reporting/analytics for a SaaS product serving 50+ customers.
- Built ERP modules covering user management, workflow automation, inventory, quotations, invoicing, order management, and enterprise reporting.
- Contributed to a FinTech Merchant Payment Platform that integrated bank APIs for payment collection, Virtual Account Number (VAN) creation, transaction status tracking, reconciliation, settlements, refunds, merchant onboarding, wallet management, and reporting, supporting daily collections of approximately ₹20–30 lakh.
- Implemented JWT-based authentication, protected routes, and role-based UI access for Admin, HR, and Employee users across HRMS, ERP, and payment modules, integrating with RBAC-secured REST APIs.
- Used Jest and React Testing Library for unit and component testing to validate component behavior and support application quality, through bug fixing, API integration validation, and UAT.
- Configured and maintained existing GitHub Actions workflows across 3+ applications, supporting builds, environment configuration, pull request checks with weekly production releases.
- Led a team of 3 engineers, managing effort estimation, requirement breakdown, task allocation, sprint planning, progress tracking, code reviews, UAT coordination, and production releases.

- Made architecture and tooling decisions collaboratively with the team, focusing on maintainability and performance, including standardizing reusable React components across modules.
- Owned features end-to-end, from requirement analysis to production release and post-release support, collaborating with project managers, stakeholders, designers, QA, and backend engineers.
- Mentored junior engineers through code reviews and architectural guidance. Applied semantic HTML, ARIA attributes, and keyboard navigation to build usable and accessible interfaces.

Frontend Developer — Thynksight Technology Pvt Ltd — Jul 2024 – Nov 2024

Mumbai, India · Insurance Domain

- Redesigned and developed responsive web interfaces for Marsh, a global insurance broker, using React.js and Redux, improving usability across mobile and desktop devices. Increased user engagement by 30%, reduced bounce rate by 25%, and increased mobile traffic by 40%, based on website analytics.
- Built reusable UI component libraries and client-specific design systems, reducing feature development effort by approximately 40% and improving frontend development efficiency.
- Collaborated with UI/UX designers, backend developers, and QA teams in an Agile environment to deliver high-quality features, ensure cross-functional alignment, and maintain client satisfaction throughout delivery cycles.

Frontend Developer — Vervali Systems Pvt Ltd — Aug 2023 – Mar 2024

Mumbai, India · Service-Based Domain

- Rebuilt the Gamistaan e-commerce platform from Figma designs to production using React.js, Redux, JavaScript ES6, and Tailwind CSS, implementing features for board game rentals, subscriptions, product discovery, and event and wedding gaming experiences.
- Improved frontend page load performance by 25% through performance optimization techniques across critical rendering paths.
- Developed the Neuberg Diagnostic healthcare platform from scratch using React.js, Redux, JavaScript ES6, and Tailwind CSS, fully API-driven features for lab test discovery, appointment booking, home sample collection, prescription uploads, and diagnostic report access.
- Developed 50+ reusable React components across multiple modules, improving UI consistency, reducing code duplication, and enhancing maintainability.
- Integrated RESTful APIs for healthcare workflows, enabling dynamic data rendering and improving application responsiveness.
- Applied component-based architecture, separation of concerns, and reusable design patterns to build scalable and maintainable frontend applications.
- Collaborated with product managers, UI/UX designers, QA engineers, and backend developers to translate business requirements and Figma designs into production-ready features.

Frontend Developer — Eureka D-soft Private Limited — Nov 2019 – Apr 2023

Mumbai, India · Piping / Construction Domain

- Delivered 4 production applications (MyApp, P-Gold, Epcproman, Prodash) for global clients including BHEL, L&T, and DORC. Developed and maintained enterprise web applications using React.js, Redux, JavaScript, and Ext.js for construction management, piping workflows, and industrial operations.
- Built MyApp, a construction management platform for equipment, electrical, and piping tracking, improving customer satisfaction by 30%. Modernized P-Gold and Epcproman by migrating legacy jQuery/Kendo UI interfaces to React.js and Redux, improving maintainability and modernizing core industrial workflows.
- Developed interactive project dashboards in Prodash using React.js and amCharts JS to visualize project schedules, costs, and risk metrics. Integrated frontend components with backend APIs to support data-driven workflows and dynamic user interfaces.
- Reduced project delivery time by 25% on Epcproman through cross-functional collaboration and requirement alignment.
- Translated Figma and Adobe XD mockups into pixel-accurate, production-ready React components across all 3 applications.

CERTIFICATION

.NET – Full Stack Developer Course | 2018

EDUCATION

BCA — Bachelor of Computer Application | S.I.C.E.S. College | 2015 – 2018
